

West&Best

JR5

better than ever

The new All-in-one
Turnkey Glue Kit

The W&B JR5 gluing kit represents **innovation** and **quality**, while being a **competitive solution**, for manual and semi-automatic application of **thermoplastic hot-melt adhesives** in multiple industries. It's a **bespoke gluing solution** able to satisfy many needs. The W&B JR5 system is a **turnkey kit** that enables a **quick and easy installation**, allowing the operator to work in **safety** and **optimize application timings**

without unnecessary waste of time due to its **ease of use**, outstanding **reliability** and **maintenance cost savings**. It consists of **1 melter** with 4,3" color **Touch Screen display**, 5 kg tank capacity and **gear pump** with **variable speed**; **1 hose** with reduced diameter and high resistance **corrugated sheath** (available in 3 different lengths); **1 hand gun** (dots, bead or spray) completed with nozzle.

W&B JR5 MELTER

- Power supply 230V **single phase** and or 400V **three phases**;
- **Ball valve** for quick glue release;
- **AC motor** inverter controlled;
- Gear pump with variable speed;
- **AUTO-OFF-MANUAL** pump operation mode;
- By-pass valve flow control and quick release pressure valve;

- User interface with 4,3" color **Touch Screen display**;
- Innovative programming through **icons' menu**;
- **Sequential heating** tank-hose-gun;
- Management of 2 independent channels;
- **Standard functions**: Economy, Clock, Weekly Program, Maximum Temperature Alarm.

JR5 *better than ever*

SHARK GUNS

- Ergonomic design and **reduced weight**;
- **Electric components and glue flow directions placed inside** the gun body and not inside the handle, in order to avoid overheating of the handle itself;
- Complete flexible usage thanks to the **360° rotating connection** and to the **lack** of any **external** electro-pneumatic **wires**;

- Activation of the gear pump through **wireless-switch mode**;
- More than 70% **reduction** of the **maintenance time**, thanks to the module equipped with **interchangeable cartridge system**;
- Lever with progressive drive and **manual lock** for preventing any unintentional adhesive release;
- Wide range of **nozzles** available for **bead** or **spray guns**;
- Activation of spray air through an innovative **double stroke lever** that excludes the use of external components and wirings.

- Especially designed for use in **manual applications**;
- New **corrugated cover**, which resists wearing and abrasion;
- **Aramid fiber** insulation that increases and improves thermal efficiency;
- **High flexible** version with reduced external diameter.

H-EVO HOSES

- To complete the installation, there are available a **wide range of accessories** and the possibility of **"Private Label"** execution.
- **Support stand** with wheels;
 - Single or double **gun holder**;
 - Spiral wire support **balancer** for hose suspension.

WHO WE ARE

WEST&BEST company is born with an ambitious project: to establish itself as a commercial structure operating in the packaging industry and offering its customers all economic and logistical advantages, which are hard to achieve with traditional sales systems.

The WEST&BEST Team (a group of young, enterprising and motivated people) address to new and dynamic Customers, who are able to evaluate the quality, reliability and technology of WEST&BEST products combined with innovative and economically attractive solutions with assured competitive prices.

The brand WEST&BEST is managed and exclusively distributed worldwide by PREO S.r.l. that, since 1938, is known on the international market for the quality of its products.
